DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see paragraph 5 on page 6, filed 12/20/2005, with respect to claims 1-21 have been fully considered and are persuasive. The rejection of claims 1-21 has been withdrawn.

Allowable Subject Matter

2. Claims 1-21 are allowed.

3. The following is an examiner's statement of reasons for allowance: Jungck teaches a processor, packet analyzer, first memory, and second memory. The packet analyzer stores a portion of a packet in the first memory for subsequent processing. The second memory stores the packet. Jungck does not teach a look-up table to determine the portion of packet to store in the first memory. Bremer (from the IDS) teaches a processor, packet analyzer, first memory, and second memory. Bremer also teaches a look-up table, but the table is used to determine the route for the packet, not which portion to store in the first memory. Bass et al. discloses in column 8 lines 7-9 that a variable number of bytes are sent to the processor. Bass does not provide any teachings about how the number of bytes to send is determined. Bass also does not provide any motivation as to why sending a variable amount of bytes to the processor is desirable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
